

BEETLE

BEETLE DLC

このナイフは我々が最初に開発したナイフです。刃型は片切り刃です。刃の片面が凸面、もう一方の面が平面で構成されています。日本刀に見ることの出来る特殊な刃型です。これは右利きの方に最適のナイフです。このナイフを木に打ち付けたとき凸面の効果で刃が食い込みを起こしにくい機能を持っています。とても良く切れてかつ強靱なナイフです。

This is a knife that we developed first. The blade type is KATAKIRIBA. The one side of the blade is composed by convex surface and other surface is composed of the plane surface. This is a special blade type in the Japanese sword that can be seen. This is the best knife for right-handed. When this knife is hit to the tree, the blade doesn't bite into the tree by the work of the convex surface. It is very sharp and a strong knife.

BLADE / KATAKITIBA

Style: DLC Coated Blade
 Full length : 190mm Blade : 85mm
 Material : YXR7 Thickness : 3.7mm
 Weight : 100g Hardness : around HRc65
 Hard coating : DLC coating
 (Thickness 3micron: Hardness of coating Hv1800)
 Scale : Aluminum
 Embellishments : Stingray
